SPECIAL MATERIALS AND CABLES

ABSTRACT

This paper presents the materials and cables with special features which are results of fast development of new materials according the needs of the market and ecology. These new materials are based on classical cable materials, with better features based on some additives or special features and the possibility of their production in Macedonia in Cable Factory “Negotino” like:

- lead free cables
- halogen free
- heat- resistant
- oil resistant
- rubber cables.

Keywords: Special materials, special cables , possibility of production.
