ANALYSING OF REACTING FOR EARTH FOULT PROTECTION OF STATOR WINDING AT GENERATORS IN THE BITOLA

ABSTRACT

In the topic is described analyses and causes for troubleshooting of generator 2 in power plants "BITOLA" at 30.08.1991. This analyses of troubleshooting was made early after that. The paper in short version was presented on the first engineer's meeting of the "POWER ELECTRICITY OF MACEDONIA" and was provoked with the similar troubleshooting of generator 3 on 18 January 1999.
